

## **WRG Genesis**

The Genesis® ATM offer's industry leading reliability, accessibility and flexibility for a free standing, retail ATM for indoor use. The Genesis provides numerous options to customize the machine to your operating environment. With WRG, you pay only for what you actually need and not for unprofitable features that can only cause maintenance or usability issues. The Genesis delivers an outstanding initial value, streamlined operations, low maintenance costs and a long useful life.

### **Modular System Design Delivers Outstanding Value.**

This elegant design reflects WRG's commitment to make service easy and to reduce your operating costs. We build the vault and assembly in the United States to improve quality and reduce transportation costs. Modularity also protects your investment, delivering a long useful life. The standard Genesis is equipped with a UL291 business-hours rating vault. Replenishment, paper loading and component replacement are quick and easy. A Sargent and Greenleaf (S&G) spin dial lock is standard. The vault has a full size door for easy access to components. It's footprint is 21" deep by 18" wide.

This system is Triple DES compliant and PCI approved to insure the highest level of security and regulatory compliance for your ATM applications. Multilingual support is standard, with English, French and Spanish available at no extra charge.
